

Special Orders for the Official Dog Scout Uniform

Our uniform capes come in many sizes (see chart below) and will accommodate most sizes and breeds of dogs. However, certain breeds or types of dogs may need a uniform made just for them. The uniform is not intended to be a full-length coat, but rather like a waist coat or vest. It should fall just past the dog's ribcage along the back.

Uniforms are fastened around the middle of the dog with Velcro, allowing for a leeway of several inches. This accommodates most average built dogs or dogs that fall within the given weight range.

Some fit challenges can be solved by simply going up or down a size. For example, breeds with profuse coats (Old English Sheepdog, Chow, Samoyed) are better fit by sizing up.

In other situations, your dog may require a custom-made uniform. This might be the case if your dog is especially small or large for his breed, if he has a barrel shaped chest (like many sighthounds), or if he has very short legs or a disproportionately long back for the size of his body.

If a custom uniform is required for your dog, the following information is required before production can begin.

- Waist measurement – around the body just below the last rib
- Chest measurement – around the body behind the front legs
- Back length – from the center back at the collar to the base of the tail
- Neck measurement – as a collar would fit
- Exact weight of the dog
- Exact height of the dog – from the floor to the top of the withers
- Your complete name, email address, and mailing address

A photo of the dog in a standing position is also helpful if it is available.

All information should be emailed to sally.hoyle@yahoo.com.

A custom uniform has an additional \$3 charge added at the time of purchase. The dog's name can be embroidered as well for an extra \$8.
